CABLE PULLING SOLUTIONS

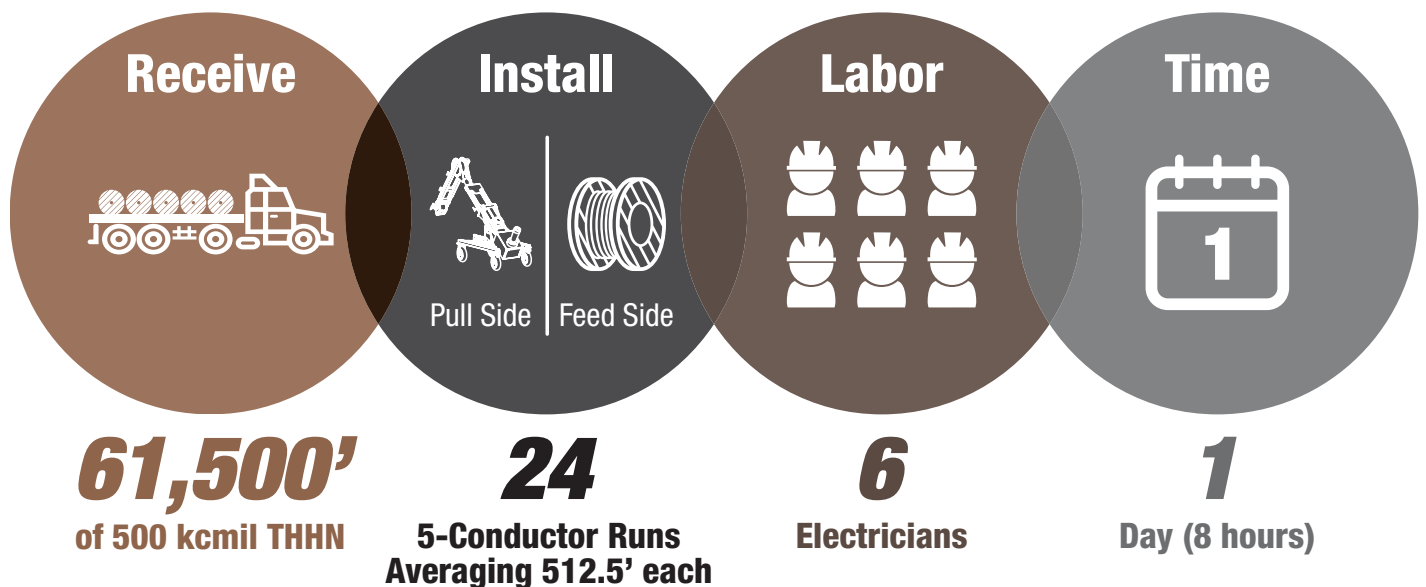

Southwire™ Cable Pulling equipment sets the industry standard. We've revolutionized these tools to make them faster, safer, and smarter than ever before. With Southwire™ Cable Pulling equipment on your job site you can see an increase in safety, efficiency, and profitability.

HOW AND WHY

Implementation of the full Southwire™ Cable Pulling System pays for itself with time and safety. A case study performed in Dalton, GA reduced a job consisting of 24 runs of 5-conductor, 500 kcmil copper THHN cable (61,500 circuit feet) using 6 electricians into one 8-hour day. Savings were captured in setup time, communication, pulling time, reset speed, and reduction of downtime.
